

Project ideas:

- Level 2 charger at OSC
 - Create cost estimate
 - Find out if there are any private supporters who could help
 - Discuss with the selectboard, and get into budget, if needed.
 - Rich is aware of someone in Cabot who has done this already.
 - Nick is willing to help with this.
- There is still Efficiency VT money available to the town.
 - Rich Baker is following up with some ideas to improve valves and some other building items at the OSC
 - Nick will reach out to him and offer help, in case he needs further ideas.
- VECAN newsletter had a capstone program to help subsidize efficient vehicles for income eligible folks.
- Weatherization
 - Button up is starting, but Rich isn't sure if there is any value here for Marshfield/Plainfield.
 - Rich looked through the old "master list" of weatherization related contacts. He believes this list may not have had people who already had weatherization work and completed it. He will make some follow-up calls about this.
 - There is a very generous program to help pay for $\frac{3}{4}$ of the weatherization cost for income eligible folks. You have to get an audit and do the work. This is open until the end of the year, or until the money runs out.
- Miscellaneous
 - Not much we can do at the moment for transportation.
 - Susan Green would still be interested in book recommendations, if anyone has any.
